CMoM Presentation – August 12, 2011

Presenter: Leo Marihart (leoofborg@gmail.com)
LI: http://www.linkedin.com/in/leomarihart
Blog: http://leoofborg.tumblr.com/

1. Lion: First look:

- New Features: Multi---touch: great for Laptops. (Open the PrefPane & Show/Tell) (also show 3--finger---tap in Cocoa Apps for Dict)

- Mission Control & LaunchPad (show off gestures of MC, as well as LP)

- Full Screen (and how/what it does w MC)

- Gotchas #1 when transferring from 10.6 (old Dictionary files, etc)

- Gotchas #2 (Mail plugins that do not work like GPGMail)

- Gotchas #3 (bye bye PPC apps. All of them)

- Gotchas #4 (what about old file formats? <--- PPC & EOL Apps, ad hoc)

- Q&A.. which segues into...

2. Mac OS X Security Tips (mainly Lion)

- Where are my logs? Which ones "matter"? Why do I care about this? (Console.app) (console.log)(system.log)(secure.log)

- What is FileVault? Lion full disk encryption? Why do I care about this?

- (Also: Knox)

- Password managers? (1Password for strong password generation). (Show XKCKD Comic) http://xkcd.com/936/ (Caution against using websites like https://www.grc.com/haystack.htm to 'test passwords') (show 'Password Assistant')

- "Phoning home"... what can or should I do about this?   (LittleSnitch, or alternatively Metakine's 'Hands Off!') (Demo LS catching SU) (Show own list of UnApproved, & how Approve Works) (Show Network Monitor)

- Less is more: "Drop the Haxies & Input Managers"   "Cut Login Items you absolutely DO NOT need." "Use Lingon to snoop in on Launch Services."

- Q&A
