May 13, 2011

**Web 2.0 is the second generation  
...of the World Wide Web...**

**[this] generation of the Web  
includes new features and  
functionality that were not  
available in the past.**

## Web 2.0 Examples:

1. Wikis
2. Blogs
3. Social Networking

**Web 3.0 is a third phase in the  
evolution of the World Wide Web,  
based on the idea that the  
Internet 'understands' the pieces  
of information it stores and is  
able to make logical connections  
between them.**
